

Get the **MOST** Out of Life: **Your 40s**

HAVE YOUR HEART IN THE RIGHT PLACE

Men in their **40s** see an increase in family, finances, and career responsibilities.

THIS CAN LEAD TO **STRESS**.

Heart disease is the **#1** killer of men **45-54**.

1 in 4 American men die of **heart disease**.

TIPS FOR DE-STRESSING

Regular Exercise

Yoga

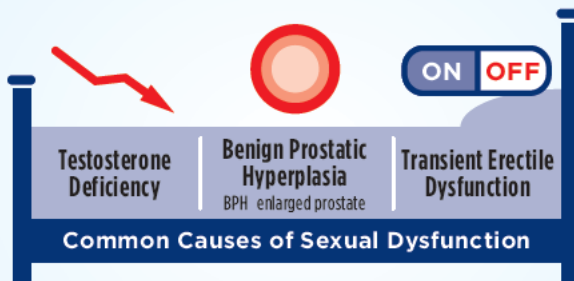

Meditation

FALLING OUT OF BED

Occasional impotence

affects about half of men between the ages of **40-49**.

Talk to your physician about any **physical, psychological, or dietary conditions** and/or medication-associated issues that may cause **sexual problems**.

GAIN A NEW PERSPECTIVE

More than **4 MILLION**

adults in America over the age of **40** have vision problems.

Schedule regular **eye exams** in your **40s** and beyond.

The most common vision problems for men between ages **41-60** is the inability to **focus** and **see clearly**.

STEPPING ON THE SCALES

BODY MASS INDEX
CALCULATE YOUR BMI

weight in lbs. x 703 =

÷ height in inches =

÷ 70 = **BMI**

HEALTHY **OVERWEIGHT** **OBESE**

18.5 25 30 +

39.5% of men **40** years and older are considered obese.

Talk to your doctor about **diabetes screening** starting at age **45**. Start younger if you are overweight and physically inactive, or have a family member with diabetes.

Being **overweight** or **obese** can lead to a myriad of health problems, including diabetes.

As you age your metabolism decreases. Know your BMI.
